THE VECTOR ELECTRIC

Introducing ESSE's all-new electric heater, the Vector. This iconic electric heater has been developed for a sophisticated customer looking for style, functionality, performance and flexibility.

A stylish addition to any room, Vector's contemporary design is the result of a collaboration between British designer Adrian Stokes and ESSE's own in-house research and development team.

Finished in a stylish graphite finish, the Vector provides both radiant and convective heat via an efficient cylindrical body enhanced by elegant fin detailing and a subtle warm amber glow.

Vector requires no installation or maintenance and can be used in any room with a standard power point, but unlike a fan heater, it is silent and draught-free. A single top-mounted dial switches the power on / off and varies the temperature. After being powered down, the Vector continues to heat a room for up to 30 minutes.

With a maximum output of 2kW, Vector can provide additional heat for occasional spaces such as spare rooms, home offices, loft, attic spaces and 'man caves'. It's the perfect appliance to give a welcome boost to additional heating in any room where families want a warm and cosy environment in which to relax.

ESSE Every ESSE cooker is made in the
United Kingdom. This edition 2018.
